Our Logo encompasses Jungian depth psychology, neuroscience, embodiment, and classical healing symbolism.

- **Labyrinth** — an ancient image of descent, ordeal, orientation, and eventual return; psychologically, very close to individuation.
- **Brain / nervous system** — the pattern also reads as cortical folds or neural pathways, which links it to neurological bases of trauma and pain.
- **Centre and path** — unlike a maze, a classical labyrinth has one path inward and one path outward: healing is not about avoiding complexity but moving through it toward a centre.
- **Circle** — wholeness, containment, the Self.
- **Cross** - the journey inward through psyche and body toward a sacred centre.
- **Laurel/olive branches** — healing, peace, wisdom, restoration, Classical.
